

Improving the quality of personnel training based on the synthesis of the triad "science-education-innovation" in this area, the department has a significant integration potential: memoranda of cooperation in the field of science and education with leading universities of the near and far abroad:

- HOF University (Germany),
- Ivanovo State Polytechnic University (Russian Federation, Ivanovo),
- EGE University (Izmir, Turkey),
- Moscow State University of Design and Technology (Russian Federation, Moscow),
- St. Petersburg State University of Technology and Design (Russian Federation, Moscow).

To undergo a scientific internship in "AzalaTextile" LLP, "South Textiline KZ" LLP, "Alatex" LLP.

Together with the sewing enterprises of the region, educational, scientific and production complexes (EBR) have been created at the bases: LLP NVP "Talapy", LLP "Special Gear Kazakhstan", LLP "Alatex". On the basis of the TSOU, students are given a real opportunity to gain practical experience of professional activity.

The system of advanced training of teaching staff is implemented through advanced training courses at the department, internships at leading universities, research institutes, organizations and enterprises of Far and near abroad.
